Abstract

You should have a short abstract.

1 Introduction

Identify a published fMRI paper and the accompanying data [1]. You should explain the basic idea of the paper in a paragraph. You should also perform basic sanity check on the data (e.g., can you downloaded, can you load the files, confirm that you have the correct number of subjects).

Briefly explain what reproducibility means and in what sense you will try to reproduce this study.

2 Data

3 Methods

4 Results

5 Discussion
